MEMORANDUM FOR: Chief, Signal Officer
Department of Army

PLEASE RETURN TO
ENGINEERING DIVISION

ATTENTION : SIGRD-6b

17 FEB 1956

SUBJECT : Request for Service Test Models, PAMM Keyer

1. This Agency has a requirement for a manual operated keying device similar to the PAMM Keying machine being developed under Signal Corps Project 823Q. We therefore have been following the development of this particular item with considerable interest.

2. During the course of a recent contact between our project engineer for this item, and your development engineers at Fort Monmouth, it was learned that preliminary tests of an engineering model of the PAMM were satisfactory, and that service test models are expected in the near future. We later contacted your Mr. R. F. Brady to verbally express our desire to obtain models of the PAMM keyer for our own test and evaluation.

3. It is therefore requested that we be furnished three (3) service test models of the PAMM keyer for our evaluation. In the event a transfer of funds is required, or other information such as shipping instructions is needed, you may contact our project engineer, [redacted]
